EXPERIENCE

Full Stack Developer (Freelance)

march 2023-PRESENT

Backend Architecture: Built scalable server-side logic and RESTful APIs using Python and Django.

Database Design: Optimized PostgreSQL schemas to ensure high data integrity and query performance.

API Integration: Developed seamless connections between React frontends and complex backend systems.

System Optimization: Refined database queries and server workflows to significantly reduce latency.

Full-Stack Delivery: Managed the end-to-end lifecycle of responsive web apps, from DB modeling to UI deployment.

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend: Django, Django REST Framework (DRF), RESTful API Design, System Architecture

Frontend: React, Tailwind CSS, Framer Motion, Responsive UI/UX Design

Databases: PostgreSQL, Database Schema Design (DBS), Query Optimization

Tools & DevOps: Git, GitHub, Postman, Linux/Terminal, API Orchestration

EDUCATION

Independent Study: Full Stack & AI Engineering:

- **Core Curriculum:** Data Structures, Algorithms, RESTful API Design, and Relational Databases.
- **Specializations:** Deep dive into **Python/Django** (Backend) and **React**(Frontend).**React**(Frontend).**React**(Frontend).

PROJECTS

Jami— a practice project

Inspired by an agency website design. Built with React.js, TailwindCSS, and JavaScript.

There are other projects too; you can visit GitHub.

LANGUAGES

English, Urdu, Hindi, Pushto

Relevant Certifications

- **boot.dev:** backend path
- **Scrimba:** full-stack developer path
